SAN DIEGO – Councilmember DeMaio turned on the switch to a safety speed sign marking the end of a strong push from the community to make Sabre Springs Parkway a safer road for the neighborhood.

In the wake of three fatalities along Sabre Springs Parkway residents took action and with the help from DeMaio's office were able to install many new safety features along the roadway.

"Public safety has to be our top priority and these road improvements will help address the ongoing problems we have had on Sabre Springs Parkway," DeMaio said.

"I would like to thank Councilmember DeMaio, the Street Department and the Sabre Springs Planning Group for making these changes to the road" Craig Levitt Chair of the Sabre Springs Planning Group said. "Road safety is a major concern among our residents and they will feel much better after these changes have been made."

"The community involvement from Sabre Springs residents and the Sabre Springs Planning Group was key in making the changes on this dangerous road. My office couldn't have completed this task without them," DeMaio noted.
